World war z movie poster hd

World War I was an international historical event. Many battles were fought around the world with volunteers and enlisted soldiers. The causes of the war, devastating statistics and interesting facts are still studied today in classrooms, history books and museums.

The Beginning and End of the War
The beginning of the war started with the assassination of the Archduke Franz Ferdinand of Austria. He was heir to the throne, but was murdered by a Serbian nationalist. The war broke out a month later when Austria-Hungary declared war on Serbia. The war began on July 28, 1914, lasting four years, three months and fourteen days. The fighting ended on Nov. 11, 1918. It would take another six months before the war would officially end with a negotiated peace treaty five years after the assassination of the archduke.

Names
The war has been called several different names. World War I is often abbreviated as WWI in writing. In conversation and writing, it is referenced with several other names. It can be referred to as The Great War, The World War, The War of Nationals and The War to End All Wars.

Casualties and Injuries
During the four years of combat, 65 million soldiers fought in the battles. Eight million of the soldiers were killed worldwide. Another 21 million were injured and seven million were maimed with missing limbs. The United States only participating in the war for seven months, but had daunting statistics for casualties and injuries. During that seven-month period, 117,000 soldiers died and 204,000 were injured.

Noteworthy Weaponry Facts
Chemical weaponry was used for the first time in World War I. Airplanes were used to fight in the war with 70 different types used by all nations. The planes allowed explosives to be dropped to the ground. A machine gun could fire 600 rounds a minute which was considered the equivalent firing of range of more than 150 rifles.

Medical Strides and Advancements
Medical strides and advancements were a benefit of the war. Blood banks were first used during the war for necessary transfusions. The blood was stored on ice for up to 28 days. Plastic surgery was invented following World War I. A surgeon started the surgeries to help shrapnel victims with extreme facial injuries. Many techniques spearheaded the way for facial reconstructive surgery.

More Info about World War Z movie
Okay, this poster is not a total disaster and yes, we've seen worse. But when a movie has an estimated budget of £175 million, surely they could do a little better than this? Also read: The top movie posters of all time

One of 2013 biggest 3D movies, World War Z is a zombie horror loosely based on the 2006 novel by Max Brooks. This poster shows Brad Pitt's character, UN employee Gerry Lane, with his family, rather obviously Photoshopped into a scene of unremitting terror and chaos. Yet the shot doesn't really fit the situation. The family look like they're in the middle of a long, exhausting hike rather than fleeing in a blind panic. The daughter and wife look more resigned than fearful. And Brad looks unnaturally calm considering he and his family all seem to be walking through a street of fire. In short, it's a bit of a mess.

Designer's dilemma
We're not one to point the finger: the designer in question was probably given no other visual assets by the studio, and denied either the time or permission to pursue a different approach, such as one based on typography or illustration. But however this poster came about, it looks more like a piece of amateur fan art than a professional movie poster, and it's not giving us a great deal of confidence in the movie itself.

Above all, we're wondering why it was approved for release at all, when other posters for the movie are already in circulation and are much, much better:
